

OFF-BOARD HIDEA EFI

MODEL
HDF2.5

€ 749,00 incl. VAT

HIDEA

The Hidea HDF2.5 is the smallest engine in the Hidea four stroke range. The HDF2.5 utilizes a single cylinder, water cooled power unit that is extremely compact in its design.

The HDF2.5 is portable and powerful. Plus, with features such as the forward neutral shift and the 360 degree pivot steering, maneuvering out on the water has never been easier. In addition, the convenient carrying handle adds to the engine's portability. With these features, it's no wonder Hidea engines are ahead of the competition when it comes to this class.

The HDF2.5 is the perfect outboard for a small canoe, dingy, or sailboat. This compact outboard has the largest displacement block in its class, as powerful as most 3.5hp outboards, giving you the utmost power in a small package.

- **Hidea HDF2.5 features**

- Truly six layers of paint, good corrosion resistance
- Using the US brand PPG paint, more beautiful exterior
- Water cooled and thermostatically controlled cooling system for consistent engine temperature
- Digital TCI ignition system for easier starting, quicker throttle response and smoother trolling
- Forward-neutral shifting with 360° steering
- Easy to check oil level gauge indicator located on the engine's side
- Light and compact
- Convenient carrying handle
- CE approved

- **Suitable for**
